Abstract
The assignment concentrates on the use of psychometric tests for talent management in the organization. Its emphasis on the importance of the test for the employees in the organization such that good quality work could be obtained in the organization. On the other hand, it also focuses on the different uses of the psychometric test in the organization that would help the companies to obtain the opportunities for prospects and also attain a good position in the market. Moreover, the psychometric test help in building talent that increases the potential of the employees in the company for providing the best performance for the goodwill of the organization.

Introduction
The test psychometrics is frequently used to describe a tremendous range of exams for the benefit of the company. This needs no longer be the case though, and the majority of organizations who invest time in grasp and incorporating them into their assessment and development practices, proceed to do so time and again. Different firms reported that 50\% of corporations in established marketplaces the application of psychometric testing, and HRAdministration recently recommended that an additional 70\% of the Companies apply for and 80\% of other businesses use them (Adamsen, & Swailes 2019).

Figure 1 Application of psychometric testing
At a high level, the use of psychometrics can be break up into two categories: 1) capacity checking out which would historically have targeted on measuring verbal, numerical and logical skills, however, which have been developed to mirror greater current specific job roles, e.g.,
call center managing an IT helpdesk abilities; and 2) self-report tests which consist of measures of personality, judgment, emotional Genius and situational judgment tests among others. Knowing which to use and when can significantly aid enterprises in getting the right people in and then developing them effectively (Boštjančič, & Slana 2018).

Figure 2 Development of the organization for the test

Psychometrics can be used successfully at all stages of the employee lifestyles cycle and regularly once they are embedded as a section of organizational culture, personnel welcomes the insights they offer, as a substitute than pick out them as something to be skeptical of. The regular capacity tests are often used in recruitment and determination processes, as a stand-alone sifting tool, e.g., in high extent graduate recruitment processes. However, frequently work purchasers on low volume, low-frequency recruitment has located that their reliance on the interview by them has led to unsatisfactory and steeply-priced decisions. The use of self-report tests, such as character assessments have extra traditionally been reserved for employee development programs, however are now greater frequent in recruitment approaches as well. They can, for example, furnish beneficial insights into what motivates individuals, what their work-styles and strengths are and their verbal exchange preferences, all of which can be efficiently harnessed to assist companies to make better recruitment decisions and open up amazing improvement conversations with employees in a teaching environment for example. Using any single device in isolation over-simplifies the puzzle to be solved, and the use of psychometrics must consequently be included as Section of a wider process where candidates can show their abilities, strengths, behaviors, and values throughout at least two, but ideally more, assessment tools. A sturdy and legitimate character test, for example, can be used to exquisite impact through informing interview questions and attractive candidates in meaningful discussions about the environments that align with their strengths and furnish the right quantity of challenge, or these which they might locate more stressful (Brouwer, & Vroom 2019).

Figure 3 Talent management through the test

The price of psychometrics can range significantly from off the shelf capability
assessments beginning fairly cheaply to the diagram of bespoke immersive on-line checking out costing hundreds of pounds. Just like many other areas inside HR, these are exciting instances for the development of psychometrics and how they might be used via organizations with synthetic intelligence (AI), laptop gaining knowledge of, and on-line technologies considerably impacting their potential. For example, desktop studying algorithms are being used to generate new psychological check objects employing mastering in real-time from these already answered, and to habits real-time voice analysis to tune the tone and stress of call center workers. Several variations of psychometric tests and immersive situational judgment exams are also being used via businesses to supply candidates with relatively attractive and realistic scenarios (Kałka 2018).

Literature review

Application of the psychometric test

The psychometric test is applied in several places in the organization. It has been seen that during recruitment the test is taken into consideration such that a good candidate can be chosen for the employment purpose in the organization which would help the organization in obtaining competitive advantage and profit ratio. Moreover, it also helps the organization in obtaining the capability of the candidate and accordingly checks their ability through the benchmarking process so that they can be hired in the organization (Deters 2017). Moreover, the psychometric test is helpful to increase the talent management process in the organization. It is because with the help of the psychometric test the talent of the employees can be obtained and accordingly proper training could be provided to the Employees for that the skills and knowledge of the employees could be improved for better was seen in the organization. On the other hand, it also helps the employees to be motivated and they are encouraged to work for the betterment of the organization with improved skills and knowledge through the training program organized by the organization. Therefore, the talent of employees could be retained by the organization by increasing the standardized testing and providing the Employees with the proper knowledge regarding their capabilities so that they can improve their ability to do good work in the organization. On the other hand, it is with the help of psychometric testing the employees would get a fuller understanding of their trade, and accordingly, they can make their progress in the organization for their development as well as for the development of the organization. On the other hand, with the help of the psychometric testing, the organization can be proved the probable candidate and can offer them the job that would increase the productivity of the organization and retain the talent of the Employees with the organization for the benefit of the organization (Brouwer, & Vroom 2019).
Figure 4 Importance of the test

Importance of psychometric test in talent management

The psychometric test plays a very important role in talent management because it helps to provide proper information to the employees regarding their talents after they go through the testing and accordingly they can modify their talent and skill for their career development in the organization. On the other hand, they can improve their capability as well as the potential to work for the organization and provide a competitive advantage to the organization such that it can stand a good position in the market. The psychometric test helps to develop talent in the organization as it helps in determining the ability and the capability of the employees working in the organization. On the other hand, the skills and the knowledge of the employees are nurtured through the proper training that is provided by the organization for the employee’s performances. It helps in increasing the productivity of the organization and ensure competitive advantage for the company. At the same time, it also helps to provide career development opportunity to the employees of the concerned organization. Moreover, the potential of the workers is increased with the good work that they produce in the work place.

Moreover, with the help of the psychometric test in the talent management organization can incorporate cooperation and coordination among the employees which would enable a good relationship and a good bonding between the management and employees for a smooth working in the organization. On the other hand, the job-based requirement can also be fulfilled by the organization by incorporating psychometric testing in the talent management of the employees because probable training can be provided to the required employees to improve their skills and knowledge to work for the goodwill of the organization. This would help the organization to obtain good quality workers to increase productivity and obtained a good position in the market by meeting the high competition with the other competitors operating in the market. At the same time, the organization would also be able to fulfill the task-based requirements by creating a good working environment for the workers. Moreover, the organization would also be able to increase the productivity of the organization by managing the talent of the staff and providing proper training to the employees working in the organization (Brouwer, & Vroom 2019).
The use of psychometric checking in the planning of the organization

The planning of the organization can be done with the help of psychometric testing because it would enable the organization to take important decisions regarding the Change management that it can employ life according to the capability and the ability of the employees working in the organization. On the other hand, the organization can take business Strategies and other factors according to employee capability. Therefore, the organization does the psychometric testing which helps the organization understand the skill and the knowledge that the employees have such that proper training will be provided to the Employees to improve their skills and knowledge for the benefit of the organization. On the other hand, it also helps the employees to be motivated and they are encouraged to work for the betterment of the organization with improved skills and knowledge through the training program organized by the organization. On the other hand, it is with the help of psychometric testing the employees would get a fuller understanding of their trade, and accordingly, they can make their progress in the organization for their development as well as for the development of the organization. Therefore, the talent of employees could be retained by the organization by increasing the standardized testing and providing the Employees with the proper knowledge regarding their capabilities so that they can improve their ability to do good work in the organization (Deters 2017).
