Abstract

Astrology is the study of the movements and relative positions of celestial bodies interpreted as having an influence on human affairs and the natural world. It is based on the belief that the position of the stars, planets, and other celestial bodies at the time of a person's birth can reveal insight into their personality, life path, and future.

Astrology is a science which helps in prediction of life basing on the planetary positions in Rashi Chart. A human being has different stages of his life performing different duties at each stage of life. This study is about the procedure that is to be followed while specifying any remedy for the problem. In Vedas there are many Vedic Therapies suggested by our Astro sages which will give relief from the problems faced by the native.

We study the planetary positions, their afflictions, positioning, benefic or malefic and analyse the result of causing the specific problem and suggest some remedy as per Vedic Astrology. The sutra followed by Archakas in Shiva Temples are Bodhayana Maharshi sutra. Bodhayana Maharshi is the first to introduce the Dharma Sutra in 800 BC to 740 AD demand lived nearly of 60 years.

Jyotish shows the path and result of karma done in past and freedom to make the future through the position of nine planets. Remedies are the solutions provided to overcome complicated situations. In Indian Astrology the main remedies include – Mantra, Tantra and Yantra.

However, there are other common remedies like using gem stones and metals to control the unfavorable phase. Vedic astrological remedies are explained by the stars and planetary positions in the horoscope and provide Vedic astrology yantra and gems duly purified with the auspicious mantras. They enhance the positive aura and remove the evil obstructions in the lives.

Remedial Measure allows one to solve his or her problems by modifying the karma in a systematic way. Each planet emits specific energy and these devine energies can be influenced by using appropriate tools and approaches.

Jyotish Remedial Measure means a conscious effort which may include

- Chanting (Japa) of Vedic prayers (Mantras),
- Wearing of gemstones (Ratnas),
- Fasting (Upavash) on certain days,
- Wearing amulets (Yantras or Kavachas), donating to the poor (Daana),
- Contributing to Vedic fire-rituals (Yajnas) etc.

In our study, we have come across many people in my daily life with some problems facing in their life. Basing on the study performed we have evaluated some of the remedial measures which have proved the absolute solution of the problem. In my experience of performing my duties as archaka in saivagama. I applied different measures to the natives who come to temple in view of resolving the problems or praise the lord to overcome their problems and lead a happy life.

As a human, it is the tendency to make some known or unknown mistakes which will affect on the Karma of our lives. By doing some of the remedial measures one is able to overcome some of the minor problems by performing the rituals in the temple in a devotional method.

We follow the step-by-step approach when a native arrives at me with a problem and suggest for the remedy of the problem.

Literature Review

Practical Remedial Measures (Based on Astrology) by Dr. L.R. Chawdhri, 2003.

In This paper various remedial measures of chanting of different mantras is explained. Their influence on the native will affect by chanting the mantras prescribed in Vedas. Different people would like to overcome different obstacles in different stages of their life. Such as some of the natives would like to overcome the health issues, some for better income, for better education, for better relation in between wife and husband, some for marriage, some for lawful debts. Etc ., everybody is suffering from different issues and would like to ensure some remedial measure by which he shall overcome the evils.

Remedial Measures In Astrology: Simple And Easy To Adopt Measures For Protection From Manevolent Planetary Effect, G.S. Kapoor,

This Popular Book on Remedies Gives Protection From Evils Caused By Afflictions or Weaknesses of Planets Through Easy and Simple Measures Like Charity, Prayers, Recitation of Mantras, *Sri Mahamrityunjaya Amruta Pasupatam, by, Sri Vangala Janardana Sarma, 3rd print published in 2008 in Telugu version.*

This Popular Book On the procedure of performing the homam and chanting rules and terms to be followed is explained clearly. By following the instructions we are able to implement Remedies for different problems that are faced by the natives. This is specially followed by Saivagama Archakas for many simple remedial measures. This

includes both the Mantra and Tantra procedures and beejakshara mantra which can be implemented who is having the Anushtanam specified by the guru. After reviewing all these papers we have implemented the different remedial measures from vedas. Some are in Saivaagama ie., in Namakam and Chamakam, from Rigveda which prefers to implement in the form of Abhishekam performed to Lord Shiva on the name of the native Sankalpam..

Methodology

There is a saying that “శివుడాజ్ఞ లేనిదే ఏమైనా కుట్టద” means nothing will happen without permission of God Lord Shiva. The more we perform Pujas to Lord Shiva the happier results can be obtained. As Lord Shiva is said to be “Abhisheka Priyudu” we perform Abhishekam as remedial measure for specific problem.

Astrology is a traditional approach where the Astrologer study the planetary positions of the native by drawing the birth chart with the help of Ephmeris. After noting the planetary positions, they are able to analyse the results basing on the Classic books written by different saints.

In this paper we are trying to throw light on the vedic remedial measures as suggested in Vedic Astrology. After implementing these remedies we observed a very good successful rate.

- ABHISHEKAM - NAMAKAM & CHAMAKAM
- DONATION
- JAPAM
- CHANTING MANTRAS
- SARVATOBHADRA MANDALAM
- PASUPATA HOMAM
- NANDEESWARA PUJA
- KALABHAIRAVA PUJA
- GEMSTONES
- SUICIDES REMEDY
- TARPANA

A detailed explanation is given for each and every remedy that was implemented.

Abhishekam – Namakam Chamakam

The most powerful way to reach the God

is Abhishekam. It is performed by the priest in the temple who is trained in Saivagama, specified Saivapuranam, Lingapuranam. If the Abhishekam is performed we shall get rid of the sufferings. There are different ways to perform Abhishekam. This is one of the remedial measure implement in basic level to overcome the temporary problems that are lying for short time. Basing on the material used in Abhishekam we can find remedial measure of the problem.

Rudrabhishekam Homam is a custom of worshipping Lord Shiva in the form of Rudra. This ritual process involves the abhishekam to Shiva Lingam, Chanting of Rudram Chamakam Japa and the fire ritual (Homam) to invoke the various aspects of Lord Shiva.

Donation

The word DANAM is a commonly used Sanskrit word. It is used by people, who do not even know Sanskrit, as it is present in almost every Indian language. The widely used meaning of the word danam is charity, but it is necessary to see the other meanings and the origins of this word. This is a Sanskrit word. Sanskrit is a classical language like Greek, Latin, and Persian. And in Sanskrit, as in most classical languages, most words are derived from a stem or root.

Danam means the act of giving, giving in marriage, giving up, communicating, imparting, teaching, delivering, handing over, gift, donation, present, liberality, charity, munificence, bribery for overcoming one's enemy, cutting, dividing, purification, cleaning, protection, pasture,

addition, distribution of food, distribution of a Vedic sacrificial meal, part, possession, share, paying back, restoring, oblation, the rut-fluid that flows from an elephant's temples, distributor, dispenser, straighten, be straight, nourishing, cherishing,

beating, striking, or wild honey.

Japam

Japam is one of the most important step in remedial measures. If a planet is found weak to make it strong and give good results we perform Japam for each planet in definite number of times basing on prescribed method in vedas. After performing the japa the archaka will give the holy water (Tirtham) to the native which helps in reducing the negativity of the planet on the situation.

| Planet | Japam Times |

Chanting Mantras

There are different mantras used for chanting by the native to overcome their difficulties. Each mantra is to be given

by the guru and peat the mantra chanting daily in a specific number of times as per the instructions. The mantras are for education, Marriage, Financial Strength. One needs to chant the following slokas to get rid of certain problems in life. Referred from Chilkur Balaji Temple VAK Magazine.

| Mantra to chant | Overcome problem |
|---|--|
| Om Hrushikesaya Namah ఓం హ్రుషీకేశాయ నమః | For Overcoming Bad habits |
| Om Vashatkaaraya Namah ఓం వషట్కారాయ నమః | For Success in Business, Interviews, visa interviews, building relationships |
| Om Srimate Namah ఓం శ్రీమతే నమః | For Handsome appearance and wealth |
| Om Aksharaya Namah ఓం అక్షరాయ నమః | For Education and better financial strength |
| Om Paramatmane Namah ఓం పరమాత్మే నమః | For self employed people, for promotions and success in games. |
| Om Bhutabhavanaya Namah ఓం భూతభవనాయ నమః - | For better health. |

Sarvatobhadra Mandalam

Sarvatobhadra Chakra Sarvatah means "everywhere" or "entirely". Bhadra means "auspicious" or "well". Sarvatobhadra chakra is a chart that shows all-round well-being and all kinds of auspicious and inauspicious results. Mantreswara's "Phala Deepika", chapter XXVI. a chapter allotted in this book to Nakshatra Gochara, Vedhas, Latta etc., principal items in the Sarvatobhadra-chakra methodology. The mere fact that a highly condensed treatise as "Phala Deepika" has allotted half a chapter covering most of the rules and regulations of this chakra illustrates the importance attached to it.

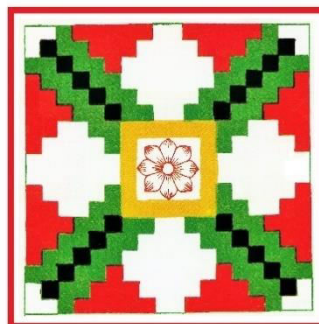

Figure 1 Sarvatobhadramandal
Basics of Sarvatobhadra Chakra: - Most of the Nakshatra based chakras depend on a zodiac of 27 Nakshatras, so they are trigonal because the number 27 has only the divisors 3 and 9.

Sarvatobhadra Chakra is drawn in a rectangle of $9 * 9 = 81$ fields. Abhijit plays a key role and gives rise to a rectangular Nakshatra chart, composed of $4 * 7 = 28$ basic fields.

We prefer to use this Sarvathobhadra Mandal to be designed by using different pulses, representing each color. It is a belief that if these

pulses used to perform puja on the Sankalp of native and perform for 10 days. Later these pulses are mixed in the river water, where the fishes and germs in the river will eat and gradually the are having the pulses the problems will be reduced for the native and attain growth and satisfaction.

Pasupata Homam

For all these issues the vedas have suggested one solution as "PASUPATA MANTRA AND TANTRAM".

This is one of the most powerful remedy that can be offered when suffering from severe problems where there is no solution. This has become a remedy to overcome these issues. The PASUPATA MANTRAM is

suggested by the God Lord Shiva to handle all the issues with most powerful chanting of mantras which can be performed by a person who is in the study of Vedas and a Brahmin performing pujas at temple who studied Agama. There are 366 Pasupata mantras defined by the vedas. The different pasupata mantras that are available in vedangas are

Kubera Pasupata Mantram : This is most powerful one to have better financial position and improvement in business

Maha Mrutyunjaya Pasupata Mantram
This is powerful one to have better life and come out of danger situations. When health issues leading to death can also be prolonged for some years.

Kanya Pasupatam Mantra : This is powerful one when a person has crossed the marriage age and too late in getting marriage will be successfully when done at right time. This is implemented for boys.

Gouri Pasupata Matranm . This is powerful one when a girl facing problems in getting married. To remove obstacles causing the late marriage one best solution.

Kalabhairava Puja

This is one of the most powerful remedy that can be offered to Lord Kalabhairava. Kaal Bhairav is one of Lord Shiva's most fearsome incarnations. Lord Brahma once became haughty and egoistic. He had five heads at the moment. Lord Shiva intended to teach him a lesson and make him more dedicated and accountable to his mission. As a result, he fashioned Kaal Bhairav from his nails, and Kaal Bhairav emerged as an avatar of Lord Shiva.

Kaal Bhairav aids in the control of one's ego. He is kind and effortlessly bestows wealth and fortune on his believers. Lord Kaal Bhairav protects each Shakti Peeth. Lord Kaal Bhairava's abilities are considered to be

sciences, making him the most favoured god among mystical professionals. Worshipping Lord Kaal Bhairav aids in the conquering of diseases, opponents, and foes, as well as helps get rid of unemployment

Nandikeswara Puja

Nandi is the bull of Lord Shiva. Nandi Puja is performed by bathing with Gangajal (Ganges Water), rinse with perfume, wipe dry and apply sandalwood paste. Offer incense and lamp. As Nandi is loyal to Lord Shiva, once you chant Om Namah Shivaya, Nandi is bound to bless you too.

"One of the most important and beneficial facts of this worship is cleaning up the Nandi sanctum within the temple to ensure good peace environment. ensure you are doing not use any sharp implements or your finger nails within the cleaning process. couple with utmost care.

ॐ तत्पुरुषाय विद्महे चक्रतुन्दय धीमहि तन्नो नंदीः
प्रचोदयात्।।

Figure 3 Nandiswara

The major benefit of the Nandikeswara Puja is to get rid of the major problems that are not also relived by Grahas. This can be offered on different times

Shukla Paksha Saptami Tithi – seventh day during the light or waxing phase of moon.

Purvabhadra Nakshtra – when there is Purva Bhadrapada or Poorurttathi nakshatram during the waxing phase of moon in a month.

It is doubly auspicious to perform the puja when Saptami Tithi and Purvabhadra nakshatra coincides To get job and to achieve professional success

chant the mantra ह्रीं श्री नंदीश्वराय नमः॥ 108 times.

Gemstones

Gemstone are the precious stones that have attracted the human beings since Vedic age. With the natural signs of hardness, purity, durability and also amazing qualities of their mysterious powers, the curiosity is still increasing. The attraction increases day-by-day as the civilisation progresses. Off all of them the gems related to nine planets were identified.

Sun : Ruby
 Moon : Pearl
 Mars : Coral
 Mercury :Emerald
 Jupiter :Sapphire
 Venus : Diamond
 Saturn : Sapphire
 Raahu : Gomedakam
 Ketu : Cat's eye
 Sun: Ruby

Suicides

Suicide is a complex issue that is influenced by many different factors, including mental health, social and cultural factors, life experiences, and individual circumstances. If someone is experiencing suicidal thoughts or attempting suicide, it is important to seek help from mental health professionals, such as therapists or counselors. They can provide support and guidance to help address the underlying issues that may be contributing to the suicidal behaviour. Additionally, seeking support from loved ones and engaging in self-care practices can also be helpful in managing suicidal ideation. When a person loses his mental ability try to attempt such things. To get the mental ability we need to suggest the person to go to temple and do meditation to get out of the bad ideas and a change in the environment is suggested. The remedial measure that can be suggested in "Sri MahaKali Puja" which throws away evils and give mental strength and braveness. Basing one the weak planets we perform donation and japa and do counselling to the person. Best is to perform pradakshina at a temple and chanting of peace mantras for 40 days could make him come out of the evils.

Tarpan

Tarpan is a ritual in Vedic Hinduism that involves offering water and other sacred materials to ancestors or deceased loved ones as a form of worship and remembrance. The word "tarpan" comes from the Sanskrit root "trp" which means "to satisfy" or "to satiate."

During the tarpan ritual, a priest or a family member pours water, milk, sesame seeds, and other offerings into a vessel and then offers it to the ancestors while reciting mantras and prayers. The water is then sprinkled on the ground or in a nearby body of water, such as a river or a pond, as a symbolic act of giving back to nature and the ancestors.

The practice of tarpan is commonly performed during important Hindu festivals such as Pitru Paksha, which is a 16-day period in the Hindu calendar dedicated to the ancestors. It is also performed on other auspicious occasions such as weddings and other family ceremonies.

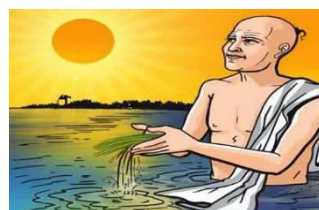

Figure 4Pandit leaving Tarpan

In devotional procedure tarpan is the 10% of Japa performed for planets. If 1000 japa is performed 10% is tarpan, 10% is homam, 10% marjanam, 10% is bhojana to a brahmin. Then after following all these in a sequence the result can be obtained 100%.

While doing puja at temple daily we leave tarpan for God, Sun God, Sandhyavandanam to offer the prayer to God.

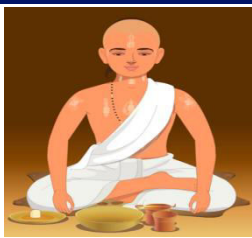

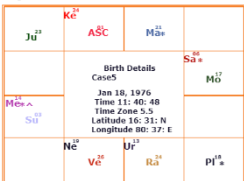

Figure 5 Sandhyavandanam

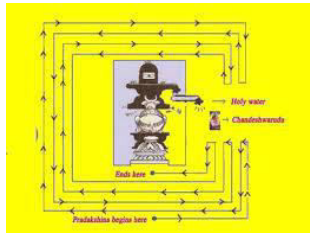

In other procedure we leave tarpan at the time of Grahana Santhi also as a symbol of performing the Santhi Danam to a brahmin performed on the days of Solar Eclipse or Lunar Eclipse as suggested by the planets and nakshatras that are affected at the time of Eclipse.

Conclusion

In this research study we have implemented different remedial measures for the problems, who have consulted me. There are many more problems faced by different people basing on different situations. In Vedas, the sages and rishis have suggested many remedial measures in different procedures. The basic level of remedial measures that can be implemented is Lal Kitab Remedies, which are simple to implement and at low cost. But there are different remedies which will have most accurate results but the risk of implementing is also high.

There are very less in number who are implementing the Pasupatam Homas. Because the mantras are so powerful and indirectly we are trying to take the negative energy from them and

converting to positive energy by chanting of these mantras. This is a time taking process but had given the fruitful results. This could be implemented at the right time of identifying of the problem only. The parayana itself takes minimum of 3 and maximum of 10 days basing the availability of japa brahmins and climatic conditions. In summer season these could take more time because of hot summer.

For the future study, it is suggested to take a large number of samples and suggest the remedies for different problems and consolidate the results. There is a need to find the different remedial measures specified by Vedas and gain knowledge about the Vedas and apply all the vedic measures.
